

CARR Biosystems supports team members in the aftermath of Hurricane Milton

“At CARR Biosystems, our commitment to community and teamwork extends beyond the workplace. Our Guiding Principle of Leadership is “We measure success by the way we touch the lives of people.” Our team demonstrated the true spirit of support by rallying together to assist Jeannine Dancey, who was impacted by Hurricane Milton. The storm caused severe damage to both her home and her mother-in-law’s property, but our incredible team members did not hesitate to step in.”

“The efforts of the CARR team were inspiring. Together, the team cleared branches, limbs, and debris from not only 1.3 acres of property but also from the home of Jeannine’s mother-in-law, where the fence had been knocked down by the storm. Additionally, with filling and packing 36 large tubs with household items for storage, the team helped ensure that everything was ready for the upcoming demo and remediation.”
